Ms. Choi, you told me if we are doing projects that save on the environment to let you know. Attached is the approved LED lighting project we will have completed by early fall. We plan on converting all of our fluorescent lights (plant wide) to LED lighting. This will reduce our energy usage by 95%.

We also are working with the Illinois Sustainable Technology Center, Prairie Research Institute, University of Illinois at Urbana Champaign to reduce our water usage. They were here a couple of weeks ago and did a plant wide assessment on our water usage which they plan on giving us a report on what we can do to reduce our water usage.

We also contracted a recycling consultant out of Champaign to help take our recycling program to the next level. The recycling consultant did a plant wide assessment of our current recycling program and submitted a report on how we can improve our existing recycling program and reach our goal of zero waste. We are in a contest with local manufacturing facilities in achieving zero waste. June we were in 1st place.

Thanks, Mark

Mr. Wathen,

Thank you for sending me those documents.
I found out that I forgot to ask about your Storm Water Pollution Prevention Plan.
I remember seeing that document when we were at your facility.

Thank you for your cooperation,

Sangsook Choi

Ms. Choi, attached are copies of our current permit and our permit renewal. If you need anything else, please let me know.

Thank you,

Mark

Hello Mr. Wathen,

I need to get a copy of the IEPA Operating Permit for your facility.
I thought I had asked for that but I didn't see that in any of emails sent to you.

Please provide the IEPA Operating Permit for your facility.

Thanks for your cooperation.
Sincerely,

Sangsook Choi
